TOXICOLOGY

VOLUME CONTENTS

Volume 62 (1990)

Review Paper

The search for chelate antagonists for chronic cadmium intoxication
by M.M. Jones and M.G. Cherian (Nashville, TN and Ontario, Canada) ..... 1—25

Research Papers

Preventive effect of zinc against cadmium-induced bone resorption (**Zn prevents Cd-induced PGE_2 production in oesteoblasts**)
by Y. Suzuki, I. Morita, Y. Yamane and S-i. Murota (Tokyo and Chiba, Japan) ..... 27—34

Olfactory and hepatic changes following a single inhalation exposure of 3-trifuoromethyl pyridine in rats: concentration and temporal aspects (**Exposure specifically damages the olfactory epithelium and liver but both tissues recover after some time**)
by B.A. Gaskell, P.M. Hext, G.H. Pigott, J.E. Doe and M.C.E. Hodge (Cheshire, UK) ..... 35—51

Diamide reduces cadmium accumulation by human lung carcinoma A549 cells (**Cadmium uptake may be affected by changes in the ratio of reduced glutathione to glutathione disulfide**)
by Y.-J. Kang, M.-S. Liu and M.D. Enger (Ames, IA) ..... 53—58

Toxicity of halothane in guinea pig liver slices (**Rank order of toxicity in guinea pig liver slices was halothane > isofluorane and enflurane > *d*-halothane > sevoflurane**
by H.N. Ghantous, J. Fernando, A.J. Gandolfi and K. Brendel (Tucson, AZ) ..... 59—69

Pharmacokinetics and metabolism of triclopyr (3,5,6-trichloro-2-pyridinyloxyacetic acid) in Fischer 344 rats (**Triclopyr is readily absorbed and most of it rapidly excreted by the kidney**)
by C. Timchalk, M.D. Dryzga and P.E. Kastl (Midland, MI) ..... 71—87

The effect of atropine on cadmium- and nickel-induced constriction of vascular smooth muscle of the dogfish shark ventral aorta (**Atropine reduced cadmium-induced vasoconstriction but had no effect on nickel-induced constriction**)
by D.H. Evans, K.E. Weingarten and J.S. Walton (Salsbury Cove, ME and Gainesville, FL) ..... 89—94

Inhibition of rat heart mitochondrial electron transport in vitro: implications for the cardiotoxic action of allylamine or its primary metabolite, acrolein (**In vitro concentrations of allylamine and of acrolein required to induce mitochondrial dysfunction appear to be much higher than might be expected to occur in vivo**)
by R.E. Biagini, M.A. Toraason, D.W. Lynch and G.W. Winston (Baton Rouge, LA) ..... 95—106

Phenol-induced stimulation of hydroquinone bioactivation in mouse bone marrow in vivo: possible implications in benzene myelotoxicity (**Radiolabelled hydroquinone and phenol bind covalently to tissue macromolecules in blood, bone marrow, liver and kidney**)
by V.V. Subrahmanyam, P. Doane-Setzer, K.L. Steinmetz, D. Ross and M.T. Smith (Berkeley, CA and Boulder, CO) ..... 107—116

Contents of Journals relating to Toxicology ..... 117—121

Review Paper

Acute carbon monoxide poisoning: animal models: A review (**Recent findings on cardiopulmonary, metabolic and tissue effects tolerance, effects on the CNS and its blood flow, neurochemistry, morphology and behavioral effects are discussed, including experimental therapeutic approaches**)
by D.G. Penny (Detroit, MI) ..... 123—160

Research Papers

The cytotoxic effects of cadmium chloride and mercuric chloride mixtures in rat primary hepatocyte cultures **(Enhanced cytotoxicity of the combination of both metals may be due to a decrease in metallothionein and not to competitive binding interaction)**
by J.H. Beattie, M. Marion, J-P. Schmit and F. Denizeau (Montreal, Quebec) ..... 161—173

Immunochemical and molecular biological studies on human placental cigarette smoke-inducible cytochrome *P*-450 dependent monoxygenase activities **(Anti-BNF-B_2 inhibited about 60 percent of aryl hydrocarbon hydroxylase and 7 ethoxyresorufin *O*-deethylase activities in placental tissues from smoking mothers)**
by M. Pasanen, T. Haaparanta, M. Sundin, P. Sivonen, K. Vakakangas, H. Raunio, R. Hines, J. Åke Gustafsson and O. Pelkonen (Oulu and Huddinge, Sweden and Detriot, MI) ..... 175—187

The effect of low-level toluene exposure on the developing hippocampal region of the rat: Histological evidence and volumetric findings **(A micromorphological study reveals effects of toluene on developing brain areas)**
by L. Slomianka, S. Edelfors, A. Ravn-Jonsen, J. Rungby, G. Danscher and M.J. West (Aarhus and Copenhagen, Denmark) ..... 189—202

Chelating agents in the treatment of acute vanadyl sulphate intoxication in mice **(Eighteen chelating agents were investigated for their excretion of vanadium and their therapeutic effectiveness)**
by J.L. Domingo, M. Gomez, J.M. Llobet and J. Corbella (Barcelona, Spain) ..... 203—211

Effects of ethanol in acute carbon monoxide poisoning **(In acute CO poisoning, ethanol provides some survival protection)**
by P. Sharma and D.G. Penny (Detroit, MI) ..... 213—226

Response of alveolar macrophages to amiodarone and desethylamiodarone, in vitro **(It is suggested that desethylamiodarone contributes significantly to toxicity)**
by C.L. Ogle and M.J. Reasor (Morgantown, WV) ..... 227—238

Subcellular localization of zirconium in nodular lymphatic cells after administration of soluble salts. Study by electron microprobe **(Zirconium is localized in liposomes of lymphatic macrophages)**
by J.P. Berry, F. Bertrand and P. Galle (Creteil, France) ..... 239—246

Contents of Journals relating to Toxicology ..... 247—248

Influence of ethanol on glutathione-*S*-transferase activity and glutathione content in the isolated perfused rabbit lung **(Ethanol has differential effects on glutathione transferase depending upon the substrate and duration of ethanol administration)**
by C. Mierha Yang and G.P. Carlson (West Lafayette, IN) ..... 249—263

Effect of ethylene glycol monomethyl ether and diethylene glycol monomethyl ether on hepatic metabolizing enzymes **(It is suspected that DiEGME and EGME are not metabolized by the same enzyme(s))**
by T. Kawamoto, K. Matsuno, F. Kayama, M. Hirai, K. Arashidani, M. Yoshikawa and Y. Kodama (Kitakyushu, Japan) ..... 265—274

Mechanism of antagonizing cyanide-induced lethality by α-ketoglutaric acid **(Alpha-ketoglutaric acid binds with cyanide and this may explain its effect on cyanide lethality)**
by J.C. Norris, W.A. Utley and A.S. Hume (Export, PA and Jackson, MS) ..... 275—283

Effects of chronic ethanol intake on aromatization of androgens and concentration of estrogen and androgen receptors in rat liver **(Ethanol increases hepatic aromatization of testosterone to estradiol)**
by K. Won Chung (Oklahoma City, OK) ..... 285—295

Effect of 3,7-bis-(4-trifluoromethylphenyl)-1,5,3,7 dioxadiazocane on pyrimidine and DNA synthesis in rat organs **(This aniline derivative inhibits DNA synthesis with some differences in organ specificity)**
by J. Seifert, H. Mostecká, Z. Machková, M.R. Berger and G.F. Kolar (Prague, Czechoslovakia and Heidelberg, F.R.G.) ..... 297—310

Evaluation of the developmental toxicity of 2,3-dimercapto-1-propanesulfonate (DMPS) in mice. Effect on mineral metabolism **(Mineral analysis of maternal and fetal tissues revealed slight effects of DMPS on metabolism of calcium, magnesium, zinc, copper and iron)**
by M.A. Bosque, J.L. Domingo, J.L. Paternain, J.M. Llobet and J. Corbella (Barcelona, Spain) ..... 311—320

Effect of the peroxisome proliferator ciprofibrate on hepatic DNA synthesis and hepatic composition following partial hepatectomy in rats **(Ciprofibrate given before partial hepatectomy partially inhibits DNA synthesis but does not affect regrowth of the liver)**
by S.A. Srinivasan, C.K. Chow and H.P. Glauert (Lexington, KY) ..... 321—332

Evaluation of nitrofurantoin on the two stages of urinary bladder carcinogenesis in the rat **(The study supports the notion that nitrofurantoin has no carcinogenic activity in rat urinary bladder)**
by R. Hasegawa, G Murasaki, M.K. St. John, T.V. Zenser and S.M. Cohen (Omaha, NE and St. Louis, MO) ..... 333—347

The effect of nortriptyline-specific active immunization on amitriptyline toxicity and disposition in the rabbit **(Circulating antibodies moderately lower amitriptyline mortality)**
by A. Sabouraud, H. Denis, M. Urtizberea, O. Chappey and J.M. Scherrmann (Paris, France) ..... 349—360

Book Review ..... 361—000

Contents of Journals relating to Toxicology ..... 363—364

Subject Index Volume 62 ..... 365—367

Author Index Volume 62 ..... 369—370

Contents Volume 62 ..... 371—373
